When Fever isn't Just Fever:
Great for Grabbing Attention & Emphasizing Urgency

in association with

OBJECTIVES

1. High-Yield Clinical Focus

- Streamlined diagnostic and management approaches tailored to the emergency department (ED)
- Emphasis on time-sensitive, life-threatening tropical diseases

2. Symptom-First Approach

- Organized by presenting complaint (e.g., fever with rash, fever with jaundice, fever with shock), mimicking real ED encounters

3. Red Flags & “Can't-Miss” Diagnosis

- Quick-reference lists of critical signs and symptoms that require immediate action.
- Prioritized differentials based on mortality risk and ED relevance

4. Geography-Linked Epidemiology

- Region-specific risk profiles to guide diagnosis in returning travelers, immigrant, or endemic population

5. Practical Diagnostic Algorithms

- Flowcharts and decision trees for rapid bedside decision-making.

6. Antimicrobial & Isolation Guidance

- Empiric treatment options with tropical relevance
- Guidance on when to isolate or notify public health

7. Case-Based Learning

- Realistic ED cases to illustrate diagnostic reasoning and clinical pearls

8. Visual Aids & Tables

- High-impact visuals: Maps, Skin Lesion Photos, Vector Identification, Incubation Timelines

9. Updated with Emerging Threats

- Covers recent Outbreaks and Emerging Infections (e.g.: Dengue, Chikungunya, Ebola, Zika, Leptospirosis, Scrub Typhus)
